

PLAY WITH A PURPOSE: THE TREEHOUSE PROJECT

We have an opportunity to redefine pediatric care for our region; from providing exceptional therapy in an immersive, inclusive space, to giving every child the strength and confidence to play, grow, and thrive alongside their peers.

Rooted in Recovery

We are transforming pediatric therapy at Sky Lakes by building a one-of-a-kind, custom therapeutic environment. The treehouse is more than a playground; it is a specialized space where children with physical, sensory, and developmental challenges can reach their milestones through the "therapy through play" model.

Branching Out

Recognizing that every child's journey is unique, our new facility is designed to meet them exactly where they are. Our nature-inspired treehouse theme replaces the traditional clinical atmosphere with a restorative forest, ensuring that advanced therapeutic tools are seamlessly woven into the interactive space.

Grow with Us

Join us and support the project by donating and sharing our mission with others to help build this treehouse. To learn more about sponsorships or naming opportunities, please contact the Sky Lakes Foundation or email foundation@skylakes.org. Let's ensure that every child has the strength and confidence to play, grow, and thrive alongside their peers.

SPONSORSHIP OPPORTUNITIES

\$100 - \$500 Giving Level

Every gift helps our treehouse come to life. Donations at this level support the essential sensory and aesthetic details that transform a clinical room into a restorative sanctuary

Forest Canopy Leaves: Individual nature-themed leaf decals applied to the walls to enhance the forest environment

\$1,000 Giving Level

Sensory Wall Panels: Tactile and acoustic panels for sensory modulation

Wall Tree Decorations: Custom aesthetic elements that create a calming "forest" environment

Distortion Mirror: Engaging tools for visual therapy and self-awareness

\$2,500 Giving Level

Sloped Wood Ladder: Custom-built for developing motor skills

Vertical Wood Ladder: Challenging children to build strength and coordination

Pegboard Wall Mount: Specialized equipment for fine motor skill development

\$5,000 Giving Level

Sloped Climbing Wall: Designed with a lower grade to help infants and toddlers practice crawling

Vertical Climbing Wall: Features custom hand-holds to challenge gross motor skills

Circle Wall Climber: A unique geometric climbing challenge

\$8,000 Giving Level

Double Stainless Steel Slide: A centerpiece for social play and physical transition

Cargo Climbing Net: High-durability polyester rope net for balance and agility

Rope Net Bridge: A custom-made bridge connecting therapeutic zones

\$10,000 Giving Level

Monkey Bar System: Comprehensive structure for upper body strength and coordination

The Observation Nest: A signature elevated "nest" area offering a sense of achievement and a bird's-eye view

Therapeutic "Forest" Canopy: Large-scale "Ceiling Clouds" that reduce noise and shape the room's atmosphere
